Sales Domain Main Diagram

Sales Strategy Management

Process Identifier: 1.12.2

Hierarchy Level: 2

Brief Description:

Develop an appropriate sales strategy to complement the market strategy.

Extended Description:

Sales Strategy Management involves developing sales partner/alliance relationship, establish overall sales budgets, establish sales goals and measures, establish customer management measures, set service levels and standards and develop channel strategy, establish revenue/coverage plan.

Sales Strategy & Planning involves initiating the development of sales relationships with other parties, establish overall sales budgets, establish sales goals and measures, establish customer management measures, set service levels and standards and develop channel strategy, establish revenue/coverage plan.

This process was renamed in 23.5. old name was Sales Strategy & Planning

Figure 1: Sales Strategy Management Children

Develop Sales Relationship

Process Identifier: 1.12.2.1

Hierarchy Level: 3

Brief Description:

Set the overall relationship strategy and initiate the development of sales relationships with other parties, such as sales partnerships and brokering, in advance of entering into formal agreements. Identifying and entering into agreements with other partners.

Extended Description:

Develop Sales Relationship sets the overall relationship strategy. It also initiates the development of sales relationships with other parties, such as sales partnerships and brokering, in advance of entering into formal agreements. Identifying and entering into agreements with other parties are managed Party Tender Management and Party Agreement Management. A party in the agreement may represent a sales channel for the other. This process initiates flows to these other processes as appropriate.

Strategies for managing relationships and relationship goals are identified and agreed upon. Sales relationship opportunities are identified along with the methods for selecting parties and for managing the relationship. Candidate parties are also identified.

This process also periodically analyzes relationship strategies and makes any necessary changes to them, including the removal of a strategy.

Establish Sales Budget

Process Identifier: 1.12.2.2

Hierarchy Level: 3

Brief Description:

Establish sales revenue, cost, and profit budgets for the enterprise.

Extended Description:

Establish Sales Budgets calculate product revenue targets for the budget, determines variable and fixed costs and overhead budgets. It uses these to estimate net profit. The combination of all of these represents the sales budget for the enterprise.

This process also conducts reviews of the budget as appropriate and makes any changes to elements that compose it.

Establish Sales Goals and Measures

Process Identifier: 1.12.2.3

Hierarchy Level: 3

Brief Description:

Establish goals and measures for sales, customer management measures, and sales service level standards.

Extended Description:

Establish Sales Goals and Measures sets sales goals and how they will be measured and how customer management sales related measures. Additionally sales service levels and standards are set.

This process also conducts reviews of goals, Sales Forecasts, measures, service levels, and standards as appropriate and adjusts them if needed.

Assess Sales Forecasts

Process Identifier: 1.12.2.3.1

Hierarchy Level: 4

Brief Description:

Evaluates forecasted sales data to reflect market demand and performance trends, providing insight for strategic sales planning and prioritization.

Extended Description:

Assess Sales Forecasts is the process of analyzing and validating forecasted sales data to determine its strategic relevance for sales strategy development. It uses forecast insights to accurately reflect market dynamics, customer demand, and internal performance trends, providing a sound basis for defining strategic sales objectives, priorities, and resource allocations.

Define Sales Metrics

Process Identifier: 1.12.2.3.2

Hierarchy Level: 4

Brief Description:

Defines the metrics, service levels, and performance standards used to measure sales goals

Extended Description:

Defines sales metrics, service levels, and performance standards, including the selection of KPIs, targets, thresholds, and measurement criteria needed to evaluate sales performance and support performance reviews and adjustments.

Review Sales Performance vs Goals

Process Identifier: 1.12.2.3.3

Hierarchy Level: 4

Brief Description:

Reviews actual sales performance against goals and established metrics to identify discrepancies and performance gaps.

Extended Description:

Review Sales Performance vs Goals reviews actual sales results against defined goals and metrics to identify discrepancies and performance gaps, analyze variances, and provide insights that support performance management and goal adjustment.

Adjust Sales Metrics

Process Identifier: 1.12.2.3.4

Hierarchy Level: 4

Brief Description:

Adjusts sales metrics and standards based on performance reviews and business needs.

Extended Description:

Adjust Sales Metrics adjusts sales goals, metrics, and standards based on performance reviews, forecasts, and business needs to maintain alignment with strategic objectives.

Develop Sales Channel Strategy

Process Identifier: 1.12.2.4

Hierarchy Level: 3

Brief Description:

Use revenue models assessment, analyze profit impact on possible sales channel structures, and develop sales channel scenarios to define sales channel strategy.

Extended Description:

Develop Sales Channel Strategy by assessing and analyzing revenue models, profit impact based on possible channel sales channel structures. It also plans and develops scenarios that are used to define the final sales channel strategy.

This process also periodically analyzes the sales channel strategy and makes any necessary changes to them, including the removal of parts or all of the strategy. Removal of the complete strategy would require its redevelopment.

- Use revenue models assessment
- Analyze profit impact on possible sales channel structures
- Develop sales channel scenarios to define sales channel strategy

Establish Revenue Coverage Plan

Process Identifier: 1.12.2.5

Hierarchy Level: 3

Brief Description:

Develop revenue targets, conduct financial and operational planning to support revenue objectives, and define sales account coverage plans.

Extended Description:

Establish Revenue Coverage Plan develops revenue targets, conducts financial and operational planning to support revenue objectives, and define sales account coverage plans.

Revenue targets are developed in order to meet revenue objectives. Financial and operational plans are also developed to support revenue objectives.

Sales account coverage plans, which include the enterprise sales targets, are defined and communicated throughout the Sales organization including any channels outside of the enterprise that may have been developed by Develop Sales Relationship.

This process also conducts reviews of revenue coverage plan as appropriate and adjusts them if needed.

Sales Development

Process Identifier: 1.12.5

Hierarchy Level: 2

Brief Description:

Develop the Sales support and response for new and existing products, as well as existing and potential customers.

Extended Description:

Sales Development processes develop the Sales support and response for new and existing products and services, as well as existing and potential customers.

Sales Development processes develop product related compensation plans, define product revenue targets, develop product related sales training, develop prospective customer identification methodology, develop selling processes/methods and procedures for new products.

As an aspect of this Sales Development processes define channels for selling the enterprise's products. It develops or ensures development of channel ability to sell and support products, including negotiating for the specific channel, defining or updating the account management process, developing pricing for a specific channel, etc.

Figure 2: Sales Development Children

Monitor Sales & Channel Best Practice

Process Identifier: 1.12.5.1

Hierarchy Level: 3

Brief Description:

Ensure that the enterprise keeps abreast of sales and channel practices and capabilities in the wider environment.

Extended Description:

The Monitor Sales & Channel Best Practice processes ensure that the enterprise keeps abreast of sales and channel practices and capabilities in the wider environment. These processes can involve externally provided research, as well as monitoring of various activities within the enterprise. These processes develop the requirements for the introduction of new sales approaches and sales channels, as well as provide requirements for enhancements to existing sales approaches and channels. This monitoring ensures that the enterprise can provide sales and channel capabilities as effectively as possible at all times. The monitoring captures issues such as compensation plans, product related sales training approaches and techniques, prospective customer identification methodologies, selling processes/methods and procedures for new products.

Develop Sales & Channel Requirements

Process Identifier: 1.12.5.1.1

Hierarchy Level: 4

Brief Description:

These processes develop the requirements for the introduction of new sales approaches and sales channels, as well as provide requirements for enhancements to existing sales approaches and channels.

Extended Description:

Not used for this process element

Monitor Sales & Channel Practices

Process Identifier: 1.12.5.1.2

Hierarchy Level: 4

Brief Description:

Monitor sales and channel practices to identify issues and improvement opportunities.

Extended Description:

These processes ensure that the enterprise can provide sales and channel capabilities as effectively as possible at all times. The monitoring captures issues such as compensation plans, product related sales training approaches and techniques, prospective customer identification methodologies, selling processes/methods and procedures for new products.

Develop Sales Channel Proposals

Process Identifier: 1.12.5.2

Hierarchy Level: 3

Brief Description:

Create and document proposals for sales processes and sales channels and gain approval for them.

Extended Description:

The Develop Sales Channel Proposals processes create and document proposals for new or improved sales channels and sales processes and secure the necessary approvals. They analyze product needs and existing or proposed channel capabilities and may require a business case to justify the proposal. Proposals may be based on industry analysis, feedback on existing channel effectiveness, or requirements from new or enhanced products. These processes also define product sales targets per channel and establish related sales and personnel performance indicators.

this process was renamed in 25.5 old name was Develop Sales & Channel Proposals

Gain Sales Proposals Approval

Process Identifier: 1.12.5.2.2

Hierarchy Level: 4

Brief Description:

These processes gain approval for proposals for sales processes and sales channels.

Extended Description:

Not used for this process element

Forecast Channel Sales

Process Identifier: 1.12.5.2.3

Hierarchy Level: 4

Brief Description:

Forecasts sales performance for existing or proposed channels to inform channel targets, performance indicators, and business justification.

Extended Description:

Forecasts sales performance for existing or proposed channels to inform channel targets, performance indicators, and business justification.

Forecast Product Sales

Process Identifier: 1.12.5.2.4

Hierarchy Level: 4

Brief Description:

Forecasts sales performance for existing or proposed products to inform channel targets, performance indicators, and business justification.

Extended Description:

Forecast sales performance for existing or proposed products to inform channel targets, performance indicators and business justification.

Create Sales Proposals

Process Identifier: 1.12.5.2.1

Hierarchy Level: 4

Brief Description:

Create and document proposals for new or changed sales processes and channels.

Extended Description:

These processes create and document proposals for sales processes and sales channels. The processes define proposals to change existing sales processes and/or channels, or to develop new sales processes and/or channels. These processes undertake the necessary identification of the needs of products, and an analysis of the existing or proposed enterprise sales process and/or channel capabilities. The proposals can be based on industry analysis from the Monitoring Sales & Channel Best Practice processes, on feedback of the effectiveness of existing sales channels from the Selling processes, or on specific requirements

associated with the development of new or enhanced products. These processes include defining product sales targets for each channel, as well as sales and sales personnel performance indicators for each channel.

Develop New Sales Channels & Processes

Process Identifier: 1.12.5.3

Hierarchy Level: 3

Brief Description:

Develop and implement new or adapted sales processes and/or channels to support new or enhanced products.

Extended Description:

The Develop New Sales Channels & Processes develop and implement new or adapted sales processes and/or channels to support new or enhanced products. These processes include the development of external relationships if required to provide the necessary sales channel capability. The development and implementation may require management of the coordination and integration of existing and new sales processes and channels to ensure effective operations. These processes include the definition of commercialization manpower profile, training program development and sales methods and procedures, compensation plans, identification of product potential customers to each channel and sale method.

Develop External Relationships

Process Identifier: 1.12.5.3.1

Hierarchy Level: 4

Brief Description:

These processes develop external relationships if required to provide the necessary sales channel capability.

Extended Description:

Not used for this process element

Manage Process & Channel Coordination

Process Identifier: 1.12.5.3.2

Hierarchy Level: 4

Brief Description:

These processes manage the coordination and integration of existing and new sales processes and channels to ensure effective operations.

Extended Description:

Not used for this process element

Define Processes & Channels

Process Identifier: 1.12.5.3.3

Hierarchy Level: 4

Brief Description:

Define sales channels, sales methods, staffing profiles, training, and compensation approaches.

Extended Description:

These processes include the definition of commercialization manpower profile, training program development and sales methods and procedures, compensation plans, identification of product potential customers to each channel and sale method

Sales Readiness & Support

Process Identifier: 1.12.7

Hierarchy Level: 2

Brief Description:

Market Sales Support & Readiness processes ensure the support capability is in place to allow the CRM Fulfillment, Assurance and Billing processes to operate effectively.

Extended Description:

Sales Readiness & Support processes ensure the support capability is in place to allow the Market Sales Fulfillment, Assurance and Billing processes to operate effectively.

The responsibilities of these processes include, but are not limited to:

- Provision of market and sales process infrastructure;
- Policy support and decision support knowledge for sales activity and sales interactions;
- Management & analysis of sales campaigns (including direct and outbound calling);
- Management and analysis of sales activity and sales opportunities (including funnel and prospect analysis and support);
- Maintaining and managing stocks of marketing collateral to be distributed using the Marketing Fulfillment processes;

- Maintaining inventories to support the sales data required by the FAB and CRM OS&R processes;
- Monitoring and reporting on the capabilities and costs of the individual Market FAB processes;
- Longer-term trend analysis on sales FAB processes in order to establish the extent to which enterprise targets for these processes are being achieved and/or the need for the processes to be modified.

These processes support the operational introduction of new processes and infrastructure to support new and/or enhanced sales capability and are responsible for conducting operations readiness testing and acceptance. They develop the procedures for the specific Fulfillment, Assurance and Billing processes and keep them up to date. After successful testing, these processes accept the new or enhanced process capabilities and manage a full-scale introduction for general availability.

Note: 25.5 this process was renamed. old name was Market Sales Readiness & Support

Figure 3: Sales Support & Readiness Children

Support Selling

Process Identifier: 1.12.7.2

Hierarchy Level: 3

Brief Description:

Administer and manage the operation of the various sales channels and to ensure that there is capability (for example, information, materials, systems and resources) to support the Selling processes.

Extended Description:

The purpose of the Support Selling processes is twofold - to administer and manage the operation of the various sales channels and to ensure that there is capability (for example, information, materials, systems and resources) to support the Selling processes so that they can operate effectively.

These processes monitor current selling trends, and are responsible for the optimization and/or redistribution of existing sales channel capability or for enabling new capability (people, facilities, infrastructure). These processes undertake trend analysis on selling, including problems, successes, profit and loss.

Support Selling processes deal with the administration of the Selling processes and the effectiveness of the channels to support new and existing products, as well as existing and potential customers. The processes ensure the effectiveness of the sales staff and channels both in terms of skill sets available, but also in terms of demand forecasting and management of utilization. These processes are also responsible for the administration and management of sales channel incentive, compensation and reward schemes, and for assessing the performance and effectiveness of sales channels.

Other marketing processes, such as Manage Campaign and Product Marketing Communications & Promotion, are responsible for determining the appropriate selling route or channel, and the required selling method and mechanism for specific market segments and channels, by product or product family, e.g., face-to-face contact, telemarketing, etc. Support Selling processes are responsible for ensuring that the sales channels are capable of implementing the required selling method and have the necessary skills and capacity to support the anticipated volumes and type of product in each market segment. These processes are responsible for providing feedback on the performance and effectiveness information as required to other marketing processes.

Sales Channels managed by these processes include retail storefronts, e.g. a third-party retailer or an enterprise's own storefront, various web sites or ISPs, B2B marketplaces or direct relationships with external parties, distributors for that product family, account teams, outbound calling teams, direct sales teams, etc.

The Support Selling processes are responsible for the collection and administration of sales leads and the associated probabilities, and for the distribution of leads to the appropriate sales channels. Leads are collected from many processes both customer facing processes and back-end processes. This process is responsible to ensure that processes are operating to collect leads wherever they arise, for the management of leads, and for the matching of the lead to the appropriate sales channel. These processes are responsible for distributing the lead into the appropriate sales channel.

Ensure Selling Capability

Process Identifier: 1.12.7.2.1

Hierarchy Level: 4

Brief Description:

Ensure that there is capability (for example, information, materials, systems and resources) to support the Selling processes so that they can operate effectively.

Extended Description:

Not used for this process element

Undertake Selling Trend Analysis

Process Identifier: 1.12.7.2.4

Hierarchy Level: 4

Brief Description:

Undertake trend analysis on selling, including problems, successes, profit and loss. Monitor current selling trends.

Extended Description:

Not used for this process element

Manage Sales Inventory

Process Identifier: 1.12.7.4

Hierarchy Level: 3

Brief Description:

Establish, manage and administer the enterprise's inventory of sales prospects, actual sales, channel management and sales commissions, as embodied in the Sales Inventory Database, and monitor and report on the usage and access to the sales inventory, and the quality of the data maintained in it.

Extended Description:

The purpose of the Manage Sales Inventory processes are twofold: establish, manage and administer the enterprise's inventory of sales prospects, actual sales, channel management and sales commissions, as embodied in the Sales Inventory Database, and monitor and report on the usage and access to the sales inventory, and the quality of the data maintained in it.

The sales inventory maintains records of all sales, sales prospects and sales leads, sales channel activity, marketing campaign targets and performance, sales commissions and any other sales related- information, required to support both the Support Selling and the Selling processes.

The sales inventory is also responsible for maintaining the association between customers and sales instances, created as a result of the Selling processes.

Responsibilities of these processes include, but are not limited to:

- Identifying and storing the inventory-relevant information requirements to be captured for sales processes and sales commission management;
- Identifying, establishing and maintaining sales inventory repository facilities;

- Establishing and managing the sales inventory management and information capture processes;
- Managing the registration and access control processes that enable processes to create, modify, update, delete and/or download sales data to and from the sales inventory;
- Ensuring the sales inventory repository accurately captures and records all identified sales details, through use of automated or manual audits;
- Tracking and monitoring of the usage of, and access to, the sales inventory repository and associated costs, and reporting on the findings
- Identifying any technical driven shortcomings of the sales inventory repository and providing input to Resource Development & Management processes to rectify these issues.

Identify Relevant Sales Inventory Information

Process Identifier: 1.12.7.4.1

Hierarchy Level: 4

Brief Description:

Identifying the inventory-relevant information requirements to be captured for sales inventory.

Extended Description:

Not used for this process element

Maintain Sales Inventory facilities

Process Identifier: 1.12.7.4.2

Hierarchy Level: 4

Brief Description:

Identifying, establishing and maintaining sales inventory repository facilities.

Extended Description:

Not used for this process element

Manage Sales Inventory Capture

Process Identifier: 1.12.7.4.3

Hierarchy Level: 4

Brief Description:

Establishing and managing the sales inventory management and information capture processes.

Extended Description:

Not used for this process element

Control Sales Inventory Access

Process Identifier: 1.12.7.4.4

Hierarchy Level: 4

Brief Description:

Managing the registration and access control processes that enable processes to create, modify, update, delete and/or download sales data to and from the sales inventory.

Extended Description:

Not used for this process element

Ensure Sales Inventory Data Quality

Process Identifier: 1.12.7.4.5

Hierarchy Level: 4

Brief Description:

Ensure the accuracy, completeness, and quality of data maintained in the sales inventory repository.

Extended Description:

Ensuring the sales inventory repository accurately captures and records all identified sales details, through use of automated or manual audits. Monitoring and reporting on the quality of the data maintained in the inventory. The sales inventory maintains records of all sales, sales prospects and sales leads, sales channel activity, marketing campaign targets and performance, sales commissions and any other sales related- information, required to support both the Support Selling and the Selling processes. The sales inventory is also responsible for maintaining the association between customers and sales instances, created as a result of the Selling processes.

Track Sales Inventory Usage

Process Identifier: 1.12.7.4.6

Hierarchy Level: 4

Brief Description:

Tracking and monitoring of the usage of, and access to, the sales inventory repository and associated costs, and reporting on the findings.

Extended Description:

Not used for this process element

Identify Sales Inventory Shortcomings

Process Identifier: 1.12.7.4.7

Hierarchy Level: 4

Brief Description:

Identifying any technical driven shortcomings of the sales inventory repository, and providing input to Resource Development & Management processes to rectify these issues.

Extended Description:

Not used for this process element

Manage Sales Accounts

Process Identifier: 1.12.7.5

Hierarchy Level: 3

Brief Description:

Manage the sales accounts assigned to the sales channel on a day-to-day basis.

Extended Description:

The purpose of the Manage Sales Accounts processes is to manage the sales accounts assigned to the sales channel and/or sales manager on a day-day basis. These processes are responsible for contacting the customers associated with each sales account on a regular basis appropriate for the type of account, to develop the appropriate relationships and contacts, to prospect for leads, to promote the enterprise's product offerings, etc.

Update Sales Repository

Process Identifier: 1.12.7.5.2

Hierarchy Level: 4

Brief Description:

Responsible for managing and updating sales repository / inventory.

Extended Description:

Not used for this process element

Contact Customer or Other Party (on regular basis)

Process Identifier: 1.12.7.5.1

Hierarchy Level: 4

Brief Description:

Contact customers or other parties regularly to manage assigned sales accounts and relationships.

Extended Description:

Contact a customer or another party who offers an enterprise's product offerings associated with each sales account on a regular basis appropriate for the type of account. The purpose is to manage the sales accounts assigned to the sales channel and/or sales manager on a day-day basis.

Support Contact/Lead/Prospect Management

Process Identifier: 1.12.7.6

Hierarchy Level: 3

Brief Description:

This process supports the ""Contact/Lead/Prospect Management"" processes in Operations by ensuring that these processes can operate effectively .

Extended Description:

This process provides support to the "Contact/Lead/Prospect Management" in Operations by ensuring that these processes can operate effectively.

The purpose of this process is ensure there is capability (for example, information, sales supporting capabilities and related resources) so that the 'Contact/Lead/Prospect Management' processes can operate effectively.

Examples of supporting capabilities are: information on how to process and distribute Sales Leads to corresponding Sales Channels. Contacts, Leads and Prospects may be identified through various processes, both customer facing processes and back-end processes are distributed for further processing by sub-processes under 'Contact/Lead/Prospect Management'.

Furthermore, these processes undertake trend analysis on contacts, leads and prospects management and they are responsible for providing support to the collection, administration and distribution of contacts, leads and prospects to the appropriate sales channels.

Sales Channel Management

Process Identifier: 1.12.8

Hierarchy Level: 2

Brief Description:

Sales Channel Management is the process of organizing, developing, and controlling the various pathways through which products and services are sold to customers.

Extended Description:

Sales Channel Management is the process of organizing, developing, and controlling the various pathways through which products and services are sold to customers. This process involves the selection, enablement, and performance oversight of direct sales teams, indirect partners (such as resellers, agents, and distributors), and digital commerce platforms. Sales Channel Management ensures alignment with business objectives, pricing consistency, and optimal customer coverage, while providing support, training, and resources to channel partners. The process also includes monitoring channel performance, resolving channel conflicts, and continually adapting the channel mix to enhance revenue generation, customer satisfaction, and market penetration. incentives and ongoing channel performance management.

in 25.5 this process name was changed old name was Channel Management

Figure 4: Sales Channel Management Children

Manage Sales Channel Strategy

Process Identifier: 1.12.8.1

Hierarchy Level: 3

Brief Description:

Manage Channel Strategy business activity controls activities to identify and plan marketing and sales channels and channel models.

Extended Description:

Sales Channel Management is the process of organizing, developing, and controlling the various pathways through which products and services are sold to customers. This process involves the selection, enablement, and performance oversight of direct sales teams, indirect partners (such as resellers, agents, and distributors), and digital commerce platforms. Sales Channel Management ensures alignment with business objectives, pricing consistency, and optimal customer coverage, while providing support, training, and resources to channel partners. The process also includes monitoring channel performance, resolving channel conflicts, and continually adapting the channel mix to enhance revenue generation, customer satisfaction, and market penetration. incentives and ongoing channel performance management.

Process name was changed in 25.5 old name was Manage Channel Strategy

Identify Sales Channel

Process Identifier: 1.12.8.1.1

Hierarchy Level: 4

Brief Description:

Identify Channel business activity is responsible for selecting the most effective Sales and Marketing channel model to reach target customers and achieve sales and marketing goals.

Extended Description:

Identify Channel business activity is responsible for selecting the most effective Sales and Marketing channel model to reach target customers and achieve sales and marketing goals.

Identify Channels includes assessing the market to identify potential sales channels, and channel partners, as well as evaluating different channel structures fit for use.

Process Name was changed in 25.5 old process name was Identify Channel

Plan Sales Channel

Process Identifier: 1.12.8.1.2

Hierarchy Level: 4

Brief Description:

Plan Channel business activity is responsible for the preparation and development of selection criteria, selection of intermediaries, and development of required training to support channel management.

Extended Description:

Plan Channel business activity is responsible for the preparation and development of selection criteria, selection of intermediaries, and development of required training to support channel management.

Plan Channel includes plans for channel partners to sell, motivating channel partners whenever required, and assessment of sales channels along with channel partners.

Process Name was chagned in 25.5 old process name was Plan Channel

Manage Channel Engagement

Process Identifier: 1.12.8.4

Hierarchy Level: 3

Brief Description:

Manage Channel Engagement business activity is responsible for developing, and maintaining interactions used across channels.

Extended Description:

Manage Channel Engagement business activity is responsible for developing, and maintaining interactions used across channels.

Manage Channel Engagement facilitates training, support, and efforts needed to help partners succeed and grow their businesses based on the enterprises' services and/or products.

Develop Channel Communication

Process Identifier: 1.12.8.4.1

Hierarchy Level: 4

Brief Description:

Develop Channel Communication is responsible for creating and implementing effective communications for Channels.

Extended Description:

Develop Channel Communication is responsible for creating and implementing effective communications for Channels.

Develop Channel Communication includes identifying the most effective communication channel for Channel Partners, developing communication messages that resonate with Channel Partners, and providing Channel partners with information the need to be successful.

Establish Channel Collaboration

Process Identifier: 1.12.8.4.2

Hierarchy Level: 4

Brief Description:

Establish Channel Collaboration is responsible for building relationships between Channel Partners in order to create mutually beneficial relationships between Channel Partners.

Extended Description:

Establish Channel Collaboration is responsible for building relationships between Channel Partners in order to create mutually beneficial relationships between Channel Partners.

Establish Channel Collaboration includes identifying common goals and objectives, developing joint Channel marketing campaigns, and collaborating on a product development roadmap.

Manage Channel Promotion

Process Identifier: 1.12.8.4.3

Hierarchy Level: 4

Brief Description:

Manage Channel Promotion business activity is responsible for controlling the publication of products and/or services through Sales and Distribution Channels.

Extended Description:

Manage Channel Promotion business activity is responsible for controlling the publication of products and/or services through Sales and Distribution Channels.

Manage Channel Promotion includes developing joint promotion campaigns, providing Channel Partners with marketing materials and resources, and tracking the effectiveness of Channel Partner marketing initiatives.

Manage Channel Promotion business activities are supported by advertising, promotions, and other marketing efforts designed to increase awareness and drive sales through channel partners.

Manage Channel Reporting

Process Identifier: 1.12.8.5

Hierarchy Level: 3**Brief Description:**

Manage Channel Reporting business activity is responsible for the collection and analysis of data related to Channel Sales and Channel Partner activities with the aim of providing insights into how well channel partners and sales channels are performing.

Extended Description:

Manage Channel Reporting business activity is responsible for the collection and analysis of data related to Channel Sales and Channel Partner activities with the aim of providing insights into how well channel partners and sales channels are performing. Manage Channel Reporting ensures sales channels and channel partners are performing through effective channel management activities. This includes developing reporting structures for Market and Sales Channels with metrics and report visualizations, overseeing the generation of Channel reports, assessing channel reports and tracking Channel performance.

Establish Sales Channel

Process Identifier: 1.12.8.6

Hierarchy Level: 3**Brief Description:**

Establish Sales Channel business activity is responsible for identifying sales channels, implementing measures to evaluate sales channels based on fit for products and services, and developing sales channel rewards.

Extended Description:

Establish Sales Channel business activity is responsible for establishing identified sales channels, implementing measures to evaluate sales channels based on fit for products and services, and developing sales channel rewards.

Establish Sales Channel maps the most appropriate sales channel for products and services.

this process changed level old number was 1.12.8.2.1

Figure 5: Establish Sales Channel Children

Identify Sales Channel Route

Process Identifier: 1.12.8.6.1

Hierarchy Level: 4

Brief Description:

Identify Sales Channel Route business activity is responsible for selecting the specific pathway to use for selling products and services to consumers.

Extended Description:

Identify Sales Channel Route business activity is responsible for selecting the specific pathway to use for selling products and services to consumers.

Identify Sales Channel Routes' includes activities to identify from all available direct and indirect routes established for business.

Implement Sales Channel Organization

Process Identifier: 1.12.8.6.2

Hierarchy Level: 4

Brief Description:

Implement Sales Channel Organization business activity is responsible for organizing the sales channel, and creating a sales team structure that is aligned with sales goals and objectives.

Extended Description:

Implement Sales Channel Organization business activity is responsible for organizing the sales channel, and creating a sales team structure that is aligned with sales goals and objectives.

Implement Sales Channel Organization includes defining the roles and responsibilities of the sales team members, establishing performance metrics and targets, and developing training programs to ensure that the sales team is equipped with the necessary skills and knowledge to achieve sales goals.

Develop Sales Channel Reward

Process Identifier: 1.12.8.6.3

Hierarchy Level: 4

Brief Description:

Develop Sales Channel Reward business activity is responsible for creating a reward system for the sales team that incentivizes them to meet market targets of products and services.

Extended Description:

Develop Sales Channel Reward business activity is responsible for creating a reward system for the sales team that incentivizes them to meet market targets of products and services.

Develop Sales Channel Reward includes defining the reward structure, setting performance metrics and targets, and developing training programs to ensure that sales teams are equipped with the necessary skills and knowledge to achieve sales goals.

Establish Sales Channel Contract

Process Identifier: 1.12.8.7

Hierarchy Level: 3

Brief Description:

Establish Sales Channel Contract business activity is responsible for developing, and maintaining Sales Channel contracts.

Extended Description:

Establish Sales Channel Contract business activity is responsible for developing, and maintaining Sales Channel contracts.

Establish Sales Channel Contract includes defining the terms and conditions of sales channel partner contracts, defining and setting performance metrics and targets, and maintaining sales channel contracts.

Figure 6: Establish Sales Channel Contract Children

Develop Sales Channel Contract

Process Identifier: 1.12.8.7.1

Hierarchy Level: 4

Brief Description:

Develop Sales Channel Contract business activity formulates legally binding agreements, setting out detailed terms and conditions of business, and requirements for Sales Channel partners.

Extended Description:

Develop Sales Channel Contract business activity formulates legally binding agreements, setting out detailed terms and conditions of business, and requirements for Sales Channel partners.

Develop Sales Channel Contract includes defining the terms and conditions of the contract, setting performance metrics and targets, and developing obligations to ensure that sales channel partners achieve their goals.

Maintain Sales Channel Contract

Process Identifier: 1.12.8.7.2

Hierarchy Level: 4

Brief Description:

Maintain Sales Channel Contract business activity is responsible for the legal, regulatory, and financial relevance of Sales Channel Contracts in line with the enterprise's business.

Extended Description:

Maintain Sales Channel Contract business activity is responsible for the legal, regulatory, and financial relevance of Sales Channel Contracts in line with the enterprise's business.

Maintain Sales Channel ensures that at all times, the organizations' Sales Channel contracts are updated in accordance with the enterprises' Channel Management ambitions.

Selling

Process Identifier: 1.12.9

Hierarchy Level: 2

Brief Description:

Responsible for managing prospective customers, for qualifying and educating customers, and matching customer expectations

Managing prospective parties with whom an enterprise may do business, such as potential existing or new customers and partners, for qualifying and educating them, and ensuring their expectations are met.

Extended Description:

Selling processes are responsible for managing prospective customers, for the qualification and education of the customer and for matching customer expectations to the enterprise's products and services and ability to deliver. These processes also manage the response to customer RFPs.

Selling is responsible managing prospective parties with whom an enterprise may do business, such as potential existing or new customers and partners. Existing customers and partners may represent new selling opportunities to them as identified by the Contact/Lead/Prospect Management.

Selling is responsible for qualifying and educating them, and ensuring their expectations are met. This process confirms matches of party expectations to an enterprise's product offerings that have been made by Contact/Lead/Prospect Management are correct. The ability to deliver them is confirmed.

This process also manages a response to customer requests for proposal (RFP). Any eventual agreement with the sales prospect is the responsibility of Party Agreement Management.

Figure 7: Selling Children

Qualify Selling Opportunity

Process Identifier: 1.12.9.1

Hierarchy Level: 3

Brief Description:

Ensure that a sales prospect is qualified in terms of any associated risk and the amount of effort required to achieve a sale.

Extended Description:

Qualify Selling Opportunity process ensures that a sales prospect is qualified in terms of any associated risk, and the amount of effort required, such as to prepare a response to a Request for Proposal [RFP]) to achieve a sale. The opportunity is explored with a sales prospect to ensure the offer meets a prospect's expectations, and to ensure that the breadth of a prospect's requirements is understood.

Extended interactions with a prospect may be required to achieve mutual understanding and agreement. The opportunity may require the development of alternative solutions or customization to the specific prospect's requirements. The Qualify Opportunity process is responsible for assessing the size of the potential development and its risk. The resources, financing and potential on-going prospect commitment to the developed solution are all factors that must be assessed.

This process also assesses the strategic importance of the opportunity, the potential for wider application, and the importance of the specific prospect to the enterprise. The solution alternatives must be available, such as capacity, or scheduled on a product offering roadmap.

Define Alternative/Customized Solutions

Process Identifier: 1.12.9.1.1

Hierarchy Level: 4

Brief Description:

Define alternative or customized solutions to address specific customer or prospect requirements.

Extended Description:

Develop, as required, alternative solutions or customization to the specific customer's requirements. This focuses on the definition of these solutions at this stage, and not the actual development of new capabilities (which may follow on)

Develop, as required, alternative solutions or customization to the specific prospect's requirements. This focuses on the definition of these solutions at this stage, and not the actual development of new capabilities (which may follow on).

Assess Potential Development & Risk

Process Identifier: 1.12.9.1.2

Hierarchy Level: 4

Brief Description:

Assess the scale, feasibility, funding, and risk of a proposed customized solution or development.

Extended Description:

Assess the size of the potential development and its risk. The resources, financing and potential on-going customer commitment to the developed solution are all factors that must be assessed.

Assess the size of the potential development and its risk. The resources, financing and potential on-going sales prospect commitment to the developed solution are all factors that must be assessed.

Assess Strategic Impacts

Process Identifier: 1.12.9.1.3

Hierarchy Level: 4

Brief Description:

Assess the strategic importance, broader applicability, and roadmap fit of the opportunity.

Extended Description:

Assess the strategic importance of the opportunity, the potential for wider application, and the importance of the specific customer to the enterprise. The solution alternatives must be available (e.g. capacity) or scheduled on a product roadmap

Assess the strategic importance of the opportunity, the potential for wider application, and the importance of the specific prospect to the enterprise. The solution alternatives must be available, such as capacity, or scheduled on a product roadmap.

Ensure Sales Prospect Expectations Met

Process Identifier: 1.12.9.1.4

Hierarchy Level: 4

Brief Description:

The opportunity is explored with a sales prospect to ensure the offer meets a prospect's expectations, and to ensure that the breadth of a prospect's requirements is understood.

Extended Description:

Not used for this process element.

Develop Sales Proposal

Process Identifier: 1.12.9.2

Hierarchy Level: 3

Brief Description:

Develop a sales proposal to respond to the customer's requirements.

Develop a sales proposal to respond to a sales prospect's requirements.

Extended Description:

The purpose of this process is to develop a sales proposal to respond to the customer's requirements. This process commences following approval by the Qualify Customer process. The development of a sales proposal may require the selection of a standard product offering, may require the development of a non-standard offering, or may require the creation of a project team to construct an offering in response to a customer's Request For Proposal. In all cases, the processes are responsible for ascertaining the customer's requirements, determining the ability of the enterprise to support the customer requirements, and developing a proposal (or proposals) for the customer which meets the stated requirements. These processes assess the extent of enterprise support required to develop the sales proposal, marshal the necessary support across the enterprise and administer the sales proposal development activity to ensure that any timing constraints associated with the customer requirements are achieved.

Note that development of a non-standard sales proposal or the response to a customer's RFP may require the development of unique solution designs. The development of unique solutions, within the context of current deployed capabilities, uses the Design Solutions process within Service Management & Operations to undertake the necessary feasibility studies. Where current capabilities are not able to support customer's requirements, the Product & Offer Capability Delivery processes are invoked to undertake any necessary assessment and business case development.

Develop Sales Proposal develops a sales proposal to respond to a sales prospect's requirements. It commences following approval by the Qualify Opportunity process if this process is applicable. The development of a sales proposal may require the selection of a standard product offering, may require the development of a non-standard offering, or may require the creation of a project team to construct an offering in response to a sales prospect's Request For

Proposal. In all cases, the processes are responsible for ascertaining a prospect's requirements, determining the ability of the enterprise to support the requirements, and developing a proposal (or proposals) which meets the stated requirements.

This process assesses the extent of enterprise support required to develop the sales proposal, marshal the necessary support across the enterprise and administer the sales proposal development activity to ensure that any timing constraints associated with the customer requirements are achieved.

Note that development of a non-standard sales proposal or the response to a customer's RFP may require the development of unique solution designs. The development of unique solutions, within the context of current deployed capabilities, uses the Design Solutions process within Service Management & Operations to undertake the necessary feasibility studies. Where current capabilities are not able to support customer's requirements, the Product & Offer Capability Delivery processes are invoked to undertake any necessary assessment and business case development.

Ascertain Sales Prospect Requirements

Process Identifier: 1.12.9.2.1

Hierarchy Level: 4

Brief Description:

Ascertain a sales prospect's requirements. This process commences following approval by the Qualify Opportunity process.

Extended Description:

Ascertain Sales Prospect Requirements ascertains a sales prospect's requirements. This process commences following approval by the Qualify Opportunity process. The development of a sales proposal may require the selection of a standard product offering, may require the development of a non-standard offering, or may require the creation of a project team to construct an offering in response to a customer's Request For Proposal.

Determine Support for Sales Prospect Requirements

Process Identifier: 1.12.9.2.2

Hierarchy Level: 4

Brief Description:

Determine the ability of the enterprise to support a sales prospect's requirements.

Extended Description:

Determine Support for Sales Prospect Requirements determines the ability of the enterprise to support a sales prospect's requirements. These processes assess the extent of enterprise support required to develop the sales proposal, marshal the necessary support across the enterprise and administer the sales proposal development activity to ensure that any timing constraints associated with the prospect's requirements are achieved.

Develop Proposal against Sales Prospect Requirements

Process Identifier: 1.12.9.2.3

Hierarchy Level: 4

Brief Description:

Develop a proposal (or proposals) for a sales prospect which meets the stated requirements.

Extended Description:

Develop Proposal against Sales Prospect Requirements develops a proposal (or proposals) for a sales prospect which meets the stated requirements. The development of a sales proposal may require the selection of a standard product offering, may require the development of a non-standard offering, or may require the creation of a project team to construct an offering in response to a customer's Request For Proposal.

Note that development of a non-standard sales proposal or the response to a customer's RFP may require the development of unique solution designs. The development of unique solutions, within the context of current deployed capabilities, may require the development of new product offerings to be considered along with supporting infrastructure.

Acquire Sales Prospect Data

Process Identifier: 1.12.9.3

Hierarchy Level: 3

Brief Description:

Capture and record all pertinent sales prospect data required for qualifying an opportunity and for the initiation, realization and deployment of the agreed sales proposal.

Extended Description:

Acquire Sales Prospect Data captures and records all pertinent sales prospect data required for qualifying an opportunity and for the initiation, realization and deployment of the agreed sales proposal. In most standard offerings the necessary sales prospect data is often captured by Contact/Lead/Prospect Management. For non-standard and/or complex sales agreements associated, for instance, with a customer RFP, extensive customer information may be required to plan and roll-out the agreed solution. For example, a smart city may require extensive capture of details surrounding deployment of IoT devices and applications to manage them.

In some cases the necessary level of precise detail may be available from Develop Sales Proposal. Where this is not the case, this process is responsible for determining the precise sales prospect information required to support the agreed sales proposal, capturing through forms, or sales prospect interviews, and so forth, the required sales prospect information, and storing the details in a form required by other processes.

Determine Required Sales Prospect Data

Process Identifier: 1.12.9.3.1

Hierarchy Level: 4

Brief Description:

Determine the precise customer information required to support the development of a sales proposal if not provided by the sales prospect.

Extended Description:

Determine Required Sales Prospect Data determines the precise customer information required to support the agreed sales proposal if not provided by the sales prospect. Data is captured through forms, or sales prospect interviews, and so forth, the required sales prospect information, and storing the details in a form required by other processes.

Capture & Record Sales Prospect Data

Process Identifier: 1.12.9.3.2

Hierarchy Level: 4

Brief Description:

Captures and record all pertinent sales prospect data required for qualifying an opportunity and for the initiation, realization and deployment of the agreed sales proposal.

Extended Description:

Capture & Record Sales Prospect Data captures and records all pertinent sales prospect data required for qualifying an opportunity and for the initiation, realization and deployment of the agreed sales proposal. In most standard offerings the necessary sales prospect data is often captured by

Contact/Lead/Prospect Management. For non-standard and/or complex sales agreements associated, for instance, with a customer RFP, extensive customer information may be required to plan and roll-out the agreed solution. For example, a smart city may require extensive capture of details surrounding deployment of IoT devices and applications to manage them.

Cross/Up Sell

Process Identifier: 1.12.9.4

Hierarchy Level: 3

Brief Description:

Ensure that the value of the relationship between the customer or other party and an enterprise is maximized by selling additional, or more of the existing, product offerings.

Extended Description:

Cross/Up Sell ensures that the value of the relationship between the customer or other party and an enterprise is maximized by selling additional, or more of the existing, product offerings. The ongoing analysis of customer or other party trends, such as usage, problems, complaints, is used to identify when the current offerings may no longer be appropriate or when the opportunity for a larger sale arises. Based on the data collected, more appropriate or other offering(s) may be recommended to the customer or other party.

Analyze Customer or Other Party Trends

Process Identifier: 1.12.9.4.1

Hierarchy Level: 4

Brief Description:

Use ongoing analysis of customer or other party trends, such as usage, problems, complaints, to identify when the current product offerings may no longer be appropriate or when the opportunity for a larger sale arises.

Extended Description:

Analyze Customer or Other Party Trends uses ongoing analysis of customer or other party trends, such as usage, problems, complaints, to identify when the current product offerings may no longer be appropriate, or when the opportunity for a larger sale arises. The purpose is to ensure that the value of the relationship with a customer or other party is maximized by selling additional or more of the existing, product offerings.

Recommend Appropriate Product Offering(s)

Process Identifier: 1.12.9.4.2

Hierarchy Level: 4

Brief Description:

Recommend more appropriate product offering(s) to the customer or other party based on the results of Analyze Customer or Other Party Trends.

Extended Description:

Recommend Appropriate Product Offering(s) recommends more appropriate or other product offering(s) to the customer or other party that may be based on the results of Analyze Customer or Other Party Trends or based on known other offerings that represent an upsell.

For example, a potential new partner may be offered the opportunity to have their logo and contact information added to an enterprise's application that manages a IoT device.

Negotiate Sales/Contract

Process Identifier: 1.12.9.5

Hierarchy Level: 3

Brief Description:

Close the sale with terms that are understood by the customer, and are mutually agreeable to both the customer and the service provider.

Close the sale with terms that are understood by the sales prospect, which now becomes a customer or some other party.

Extended Description:

The purpose of this process is to close the sale with terms that are understood by the customer, and are mutually agreeable to both the customer and the service provider. This process may involve obtaining customer agreement to standard terms and conditions. The agreement process may require interaction with the customer to ensure that the standard terms and conditions are understood by, and are acceptable to, the customer.

In some cases this process may involve the development of, and negotiation with the customer of, non-standard terms and conditions associated with sales proposals specifically developed to meet specific customer requirements. For complex sales proposals associated with customer RFPs this process may extend over long time periods and require extensive interaction with customers to achieve agreement. Aspects of contract price determination may include issues of CPE prices from third party vendors, allowances based on customer location, etc. For RFPs, many of the commercial terms being sought may be developed or originated by the customer, and the negotiating team may need to develop strategies to achieve acceptable commercial outcomes. The sale is concluded through negotiations and joint agreement on features, service levels, pricing and discounts, resulting in a sign-off formal agreement/contract between the customer and service provider. Depending upon specific circumstances, final agreement from the Service Provider's perspective may require escalation to, and agreement from, an appropriately delegated manager. The formal agreement could include zero or more confirmed orders from the customer. These orders are then passed on as requests to allow formal Customer Orders to be generated and processed.

Negotiate Sales/Contract closes the sale with terms that are understood by the sales prospect, which now becomes a customer or a some other party that make an enterprise's offerings to the market, such as a partner, and are mutually agreeable to both the customer or other party and an enterprise. This process may

involve obtaining an agreement which contains standard terms and conditions. The agreement process may require interaction with the party to ensure that the standard terms and conditions are understood by, and are acceptable to, them.

In some cases this process may involve the development of, and negotiation with a party of, non-standard terms and conditions associated with sales proposals specifically developed to meet specific party requirements.

For complex sales proposals associated with customer RFPs this process may extend over long time periods and require extensive interaction with a customer to achieve agreement. Aspects of contract price determination may include issues of CPE prices from third party vendors, allowances based on customer location, and so forth.

For RFPs, many of the commercial terms being sought may be developed or originated by a customer, and the negotiating team may need to develop strategies to achieve acceptable commercial outcomes. The sale is concluded through negotiations and joint agreement on features, service levels, pricing and discounts, resulting in a sign-off formal agreement/contract between a party and an enterprise. Depending upon specific circumstances, final agreement from an enterprise's perspective may require escalation to, and agreement from, an appropriately delegated manager.

The formal agreement could include zero or more confirmed order requests from a party. These requests are then passed to other processes to allow formal party or customer orders to be generated and processed.

Note that the Party Agreement Management process manages the lifecycle of the agreement, such as negotiating and approving it.

Manage Sales Agreement

Process Identifier: 1.12.9.5.1

Hierarchy Level: 4

Brief Description:

Party Agreement Management manages the lifecycle of the agreement, such as negotiating and approving it.

Extended Description:

Not used for this process element.

Create Customer or Party Order Request

Process Identifier: 1.12.9.5.2

Hierarchy Level: 4

Brief Description:

Create a standard and/or non-standard order request (in ITIL, "RFCs") for handover to be fulfilled.

Extended Description:

Create Customer or Party Order Request creates a standard and/or non-standard order request (in ITIL, "RFCs") for handover to be fulfilled. The request is passed to other processes to allow formal party or customer orders to be generated and processed or to allow the purchase of one or more product offerings.

Contact/Lead/ Prospect Management

Process Identifier: 1.12.11

Hierarchy Level: 2

Brief Description:

Develop the appropriate relationships with contacts, leads, and prospects with the intent to convert them to consumers, such as customers, or providers, such as partners, of an enterprise's offerings.

Extended Description:

Contact/Lead/Prospect Management develops the appropriate relationships with contacts, leads, and prospects with the intent to convert them to consumers, such as customers, or providers, such as partners, of an enterprise's offerings.

Traditionally this process focuses on a future/existing customer perspective. However, these processes, particularly in today's digital ecosystem, also do, or should, focus on these from a party, such as a partner, who may offer an enterprise's offerings to the market and acquire them in some form, either by on-boarding the enterprise's offerings and fulfilling orders for them directly, or offering them and passing orders on to the enterprise. These parties who represent "consumers" of an enterprise's offerings and "providers" of enterprise's offerings move through a similar contact/lead/prospect lifecycle and are targets for an enterprise's selling process. The parties may be those with whom the business already has a relationship, but represent possible new selling opportunities for an enterprise.

This process interacts with the Party Relationship Development & Retirement process to collect data about a party.

Note: There is no strict rule that a party has to move from contact to lead to prospect and then to the Selling process. A contact could become a prospect.

Figure 8: Contact/Lead/Prospect Management Children

Manage Sales Contact

Process Identifier: 1.12.11.1

Hierarchy Level: 3

Brief Description:

Manage all sales contacts between potential or existing parties and the enterprise.

Extended Description:

Manage Sales Contact manages all contacts between potential or existing parties and the enterprise. It deals with the creation of a contact, its development and updates to it.

This process interacts with Customer Interaction Management and Party Interaction Management to manage the contact once a Market/Sales related interaction is initiated by a party.

Create Sales Contact

Process Identifier: 1.12.11.1.1

Hierarchy Level: 4

Brief Description:

Create a sales related contact that has been initiated by an interaction with a party.

Extended Description:

Create Sales Contact creates a sales related contact that has been initiated by an interaction with a party. For example, an individual from an existing customer may make contact with an enterprise to express an interest expanding the customer's relationship with the enterprise; a potential partner may make contact with an enterprise based on viewing an enterprise's web site that has advertised for new partners who are interested marketing the enterprise's offerings; or an enterprise may assemble a list of contacts to whom marketing communications are to be sent.

Information about the contacting party is collected via an interaction with the Party Relationship & Development process.

Develop Sales Contact

Process Identifier: 1.12.11.1.2

Hierarchy Level: 4

Brief Description:

Initiate interaction with a sales contact, record additional information about the contact, and make updates a contact's information.

Extended Description:

Develop Sales Contact initiates contact with a party to acknowledge their interest via the Customer or Party Interaction Management process. It records more party information about a contact, such as offerings that are of interest, and updates any information about a contact based on interaction(s) with them.

Figure 9: Develop Sales Contact Children

Initiate Interaction With Sales Contact

Process Identifier: 1.12.11.1.2.1

Hierarchy Level: 5

Brief Description:

Initiate contact with a party to acknowledge their interest via the Customer or Party Interaction Management process.

Extended Description:

Initiate Interaction With Sales Contact initiates contact with a party to acknowledge their interest via the Customer or Party Interaction Management process. This process may be repeated based on the response to the interaction that is provided to the Record Additional Sales Contact Information process.

Record Additional Sales Contact Information

Process Identifier: 1.12.11.1.2.2

Hierarchy Level: 5

Brief Description:

Record more party information about a contact, such as offerings that are of interest.

Extended Description:

Record Additional Sales Contact Information records more party information about a contact, such as offerings that are of interest based on the interaction with the party.

Analyze Sales Contact Interaction

Process Identifier: 1.12.11.1.2.4

Hierarchy Level: 5

Brief Description:

Analyze the results of the interaction with a contact to determine if they should be turned over to Manage Lead or to the Manage Prospect process.

Extended Description:

Analyze Sales Contact Interaction determines if a contact should be turned over to Manage Sales Lead or to the Manage Sales Prospect process. If not, then the contact's status is changed to reflect this, such as no longer of interest (to the enterprise) or inactive.

Manage Sales Lead

Process Identifier: 1.12.11.2

Hierarchy Level: 3

Brief Description:

Collect and administer a sales lead and the associated probabilities of the lead becoming a prospect.

Extended Description:

Manage Sales Lead collects and administers a sales lead and the associated probabilities of the lead becoming a prospect. A leads is collected from many processes, both customer/party facing processes and back-end processes. This process is responsible to ensure that processes are operating to collect a lead wherever they arise.

A sales lead is identified and evaluated. Other processes are notified, such as Manage Sales Prospect, or Customer or Party Interaction Management, for further action.

Identify Sales Lead

Process Identifier: 1.12.11.2.1

Hierarchy Level: 4

Brief Description:

Identify a sales lead following on from marketing campaign advertising, or one that arises otherwise in the course of business and collected here.

Extended Description:

Identify Sales Lead identifies a sales lead following on from marketing campaign advertising, or one that arises otherwise in the course of business and collected here.

A sales lead, rather than a contact, may be identified as the target for a marketing communication, such as one that invites a party to initiate contact with an enterprise about one or more product offerings and provides a personal invitation number with the communication.

Information about the contacting sales lead is collected via an interaction with the Party Relationship & Development process.

Develop Sales Lead

Process Identifier: 1.12.11.2.2

Hierarchy Level: 4

Brief Description:

Initiate interaction with a sales lead, record additional information about a lead, and makes updates to a lead's information.

Extended Description:

Develop Sales Lead initiates contact with a sales lead to acknowledge their interest via the Customer or Party Interaction Management process. It records more party information about a sales lead, such as offerings that are of interest, and updates any information about a lead based on interaction(s) with them.

Figure 10: Develop Sales Lead Children

Initiate Interaction With Sales Lead

Process Identifier: 1.12.11.2.2.1

Hierarchy Level: 5

Brief Description:

Initiate contact with a sales lead to acknowledge their interest via the Customer or Party Interaction Management process.

Extended Description:

Initiate Interaction With Sales Lead initiates contact with a sales lead to acknowledge their interest via the Customer or Party Interaction Management process. This process may be repeated based on the response to the interaction that is provided to the Record Additional Sales Lead Information process.

Record Additional Sales Lead Information

Process Identifier: 1.12.11.2.2.2

Hierarchy Level: 5

Brief Description:

Record more party information about a sales lead, such as offerings that are of interest.

Extended Description:

Record Additional Sales Lead Information records more party information about the sales lead, such as offerings that are of interest based on the interaction with the lead.

If a marketing communication included product offering information this process may also confirm interest in it and/or record additional offerings for which the sales lead is interested.

Evaluate Sales Lead

Process Identifier: 1.12.11.2.3

Hierarchy Level: 4

Brief Description:

Evaluate a sales lead and notify other processes, such as Manage Sales Prospect, that a lead exists for further action.

Extended Description:

Evaluate Sales Lead evaluates a sales lead and notifies other processes, such as Manage Sales Prospect, that a lead exists for further action. If a lead is not turned over to another process, then the lead's status is changed to reflect this, such as no longer of interest (to the enterprise) or inactive.

Manage Sales Prospect

Process Identifier: 1.12.11.3

Hierarchy Level: 3

Brief Description:

Match a sales prospect with the most appropriate products and ensure that a prospect is handled appropriately.

Extended Description:

Manage Sales Prospect matches a sales prospect with the most appropriate products and ensure that a prospect is handled appropriately. A prospect represents a “pipeline” of potential sales, each of which is expressed in terms of the probability of successful sales closure and an estimate of the total attainable revenue.

The needs of a sales prospect are analyzed. Based on these needs, potential solutions are identified from an enterprise’s product catalog. The lifecycle of a prospect is tracked, and the outcome (win or loss) for a prospect is reported. A prospect is also assigned to the appropriate sales channel.

Identify Sales Prospect

Process Identifier: 1.12.11.3.1

Hierarchy Level: 4

Brief Description:

Create a sales prospect based on input from other processes, such as Analyze Sales Contact Interaction or Evaluate Sales Lead. Assign a prospect to the appropriate sales channel.

Extended Description:

Identify Sales Prospect creates a sales prospect based on input from other processes, such as Analyze Sales Contact Interaction or Evaluate Sales Lead. Assign a prospect to the appropriate sales channel.

A sales prospect is considered to be a qualified sales lead or qualified sales contact. Qualification is dependent on an enterprise's criteria. Criteria may be that the prospect has the money, the authority, and the need to acquire an enterprise's offering(s). And, that the acquisition fits within an enterprise's timeline guidelines for the acquisition; for example, acquisition will be made within the next month, two months, and so forth.

Develop Sales Prospect

Process Identifier: 1.12.11.3.2

Hierarchy Level: 4

Brief Description:

Initiate interaction with a sales prospect, analyzes a prospect's needs and identifies potential solutions for them.

Extended Description:

Develop Sales Prospect initiates contact with a sales prospect to acknowledge their interest via the Customer or Party Interaction Management process. It also analyzes a prospect's needs and identifies one or more potential product offerings for them. Offerings may expand or change any suggested product offerings that have already been provided to them.

Figure 11: Develop Sales Prospect Children

Initiate Interaction With Sales Prospect

Process Identifier: 1.12.11.3.2.1

Hierarchy Level: 5

Brief Description:

Initiate contact with a sales lead to acknowledge their interest via the Customer or Party Interaction Management process.

Extended Description:

Initiate Interaction With Sales Prospect initiates contact with a sales prospect to acknowledge their interest via the Customer or Party Interaction Management process. This process may be repeated based on the response to the interaction that is provided to the Gather Sales Prospect Needs and based on the results of Analyze Sales Prospect Needs and Identify Sales Prospect Potential Solutions processes.

Gather Sales Prospect Needs

Process Identifier: 1.12.11.3.2.2

Hierarchy Level: 5

Brief Description:

Collect needs from a sales prospect in addition to one or more product offerings that may have already been expressed as of interest to a prospect or recommended to a prospect.

Extended Description:

Gather Sales Prospect Needs collect needs from a sales prospect in addition to one or more product offerings that may have already been expressed as of interest to a prospect or recommended to a prospect. The needs are collected via the Party or Customer Interaction Management processes that is triggered by Initiate Interaction With Sales Prospect.

For example, a marketing communication sent to a sales prospect may have suggested one or more product offerings; a potential partner may have expressed interest in marketing one or more of an enterprise's offerings.

Analyze Sales Prospect Needs

Process Identifier: 1.12.11.3.2.3

Hierarchy Level: 5

Brief Description:

Analyze the needs of a sales prospect to identify one or more potential product offerings to recommend to a prospect.

Extended Description:

Analyze Sales Prospect Needs analyzes the needs of a sales prospect. Based on the analysis of a prospect's needs, one or more potential product offerings are identified from an enterprise's product catalog to recommend to a prospect.

The product offerings may be in addition or different than the offerings in which a prospect expressed interest. For example, the offering or offerings may represent upselling/cross selling; it may be that a customized offering is needed. If this is the case then the solution is further analyzed by the Selling process.

Initiate Interaction With Sales Prospect triggers an interaction with a party to communicate the suggested offering(s) to a party.
